

Public Joint Stock Company «Selenginsky pulp and cardboard mill»

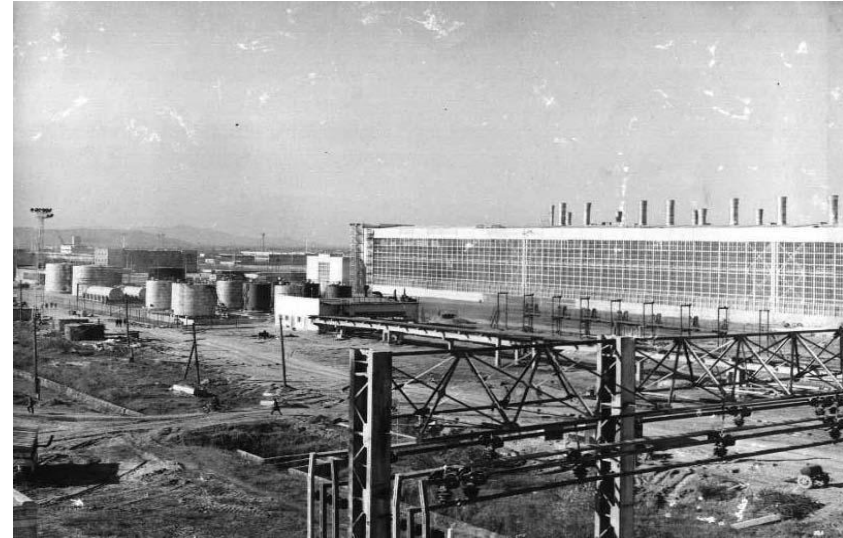

HISTORY OF THE ENTERPRISE

OJSC Selenginsky Pulp and Cardboard Mill is the large industrial enterprise, producing sulphate unbleached pulp – the basis for the production of cardboard and corrugated products.

Construction of the Selenginsky pulp and cardboard mill began in **1959**.

The construction was announced as **the All-Union Shock Komsomolskaya**.

On June 30, 1973, an act of the State Commission was signed on the commissioning of the first stage of the plant. This date became the birthday of the Selenginsky pulp and cardboard mill.

THE ENTERPRISE IN NUMBERS

49

years on the market

1 700

of employees

9

countries – international partners - China, Mongolia, India, Afghanistan, neighboring countries.

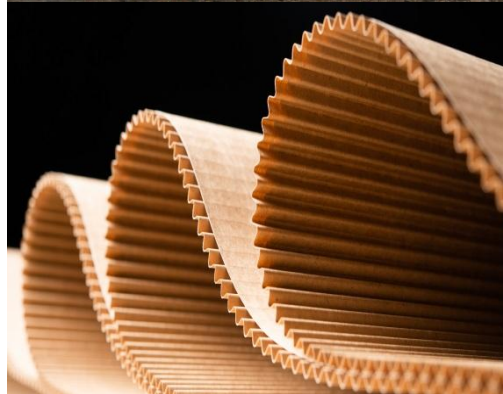

> 50

of awards and victories

Annual production
MORE THAN

▼
100,000 tons
of cardboard and paper

40 million m²
of corrugated products

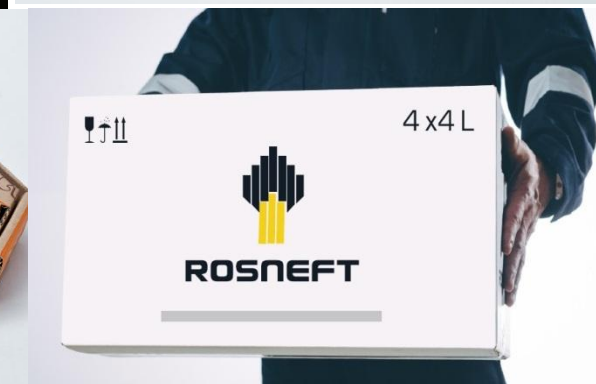

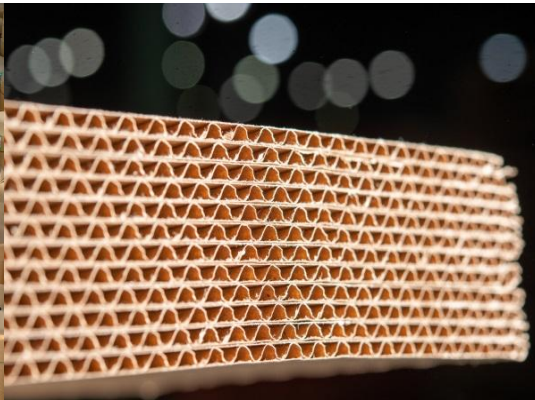

4 000 tons
of wood chemical products

PERFECT CARDBOARD RULES

- Selenginsky pulp and cardboard mill is ecological and waste-free production with **a wide range** of products of guaranteed quality **at affordable prices** and thoughtful flexible logistics.
- The main products of the plant are made **from wood raw materials** and it is a universal, inexpensive and **environmentally friendly** material, easily disposed of, recycled and put back into production without polluting the environment.
- The entire range of finished products is produced **in strict accordance with the requirements of regulatory documentation** and has certificates of conformity in the Voluntary Certification System of the Russian Federation. Along with this, the company operates **the BRC International Safety and Quality System.**

OUR PRODUCTS

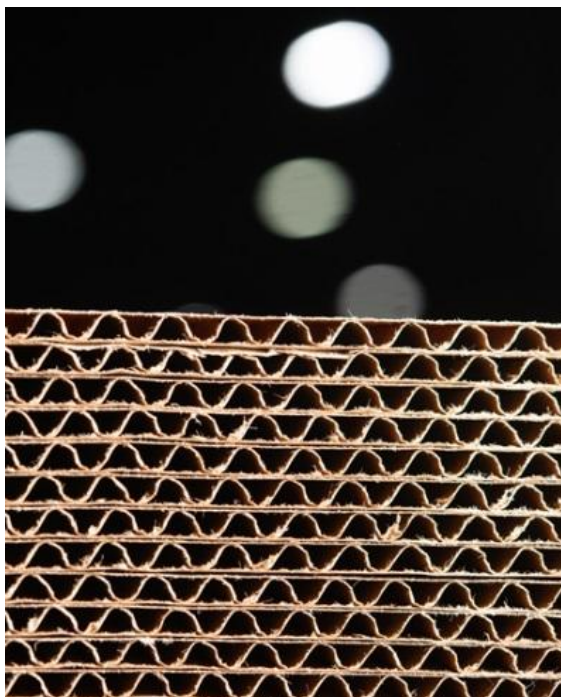

KRAFT LINER

- Intended for production of packaging, which is a basis for retail and transport containers production (boxes, trays, etc.), as well as for production of supportive packing applications (inserts, lattices, feed wells, laying, shock-absorbers) and other products.
- It is made of **100% pulp** and is suitable for food products packaging.
- Cardboard for flat layers corresponds to **high quality indicators** exceeding the requirements of Russian National Standard (GOST).
- Cardboard is manufactured according to the customer's individual dimensions in rolls of various sizes, from 700 up to 2800 mm.
- All brands of packaging board are **efficiently processed** on all types of corrugators, from low-speed low-format equipment types to modern high-speed corrugators.

CORRUGATED BOARD

- Production of micro corrugated cardboard, three-layer and five-layer corrugated cardboard of **T22-T27** brands, class 2 and **P32, P34** brands, class 3.
- Corrugated cardboard is manufactured with corrugations **C, B, E**; produced in sheets.
- Any configurations and dimensions.

BOARD PACKING

- It has high physical and mechanical properties, high load capacity while stacking.
- It is suitable for packaging, storage and transportation of production.
- **It provides safe transportation** of goods.
- Manufactured of cardboard and corrugated paper made of **100% pulp**, suitable for **food products** packaging and transportation.

CARDBOARD TRAYS

- Intended for **packaging and transportation** of confectionery products, vegetables and fruits, jars, bottles and other goods.
- Possess **high mechanical resistance**, easy to assemble, it is **possible to manufacture according to the customer's individual dimensions**.
- Completely safe for the environment, because made of **100% pulp**.

RETAIL PACKAGING READY TO BE LAID OUT (SPR)

- Designed for **packaging the finished product** on an automatic line.
- Provides **fast replenishment of goods on retail shelves** due to the elaborate packaging design.

SELF-ASSEMBLED PACKAGING FOR MAIL AND ONLINE TRADE

- Designed for the **transportation of heavy, bulk cargo** and long-term storage in warehouses.
- **The ideal solution** for online stores and online trade.
- It is possible to **apply a corporate logo**.

PIZZA BOXES

- Fabrication material: three-layer corrugated cardboard.
- **Perfect** for delivery of pizza.
- **Quick-assembly** construction.
- **100% biodegradable packaging.**
- Shipped in flat disassembled form.
- **It takes little space** during storage and transportation.

CARDBOARD REEL CORES

- Our cardboard reel cores are produced of **selected raw materials** and **100% environmentally friendly**.
- **We offer a wide range of sizes**, both on diameter and length, **ideal** for various purposes: craft liner winding, chalk overlay paper winding, newsprint winding, paper (offset, roto-offset) winding, corrugated paper winding, paper for packing (craft, etc.), papers of sanitary and hygienic appointment winding and also for various polyethylene films and packages.

WOOD CHEMICAL PRODUCTION: Raw tall oil and crude sulphate turpentine:

- Tall oil is used as a substitute for industrial vegetable oils in the production of olefinic oils, as a corrosion inhibitor, as a component of washing liquids intended for drilling and synthesis surfactants. In recent years, there has been **an improvement in the quality of tall oil** by this we mean an increase in the acid number and the content of resin acids.
- Sulphate raw turpentine **is demanded** in paint industry as a solvent and for removing old paint. In the chemical industry it is used as a raw material for the production of many useful products. Camphor, terpene hydrate, terpineol, fragrances, synthetic resins, insecticides, flotation and lubricating oils, artificial fibers, some organic compounds, household chemicals are made of turpentine, also **raw turpentine is a raw material** for the production of substances used in the perfume and pharmaceutical industries.

SALES GEOGRAPHY

НАШИ ПРЕИМУЩЕСТВА

We produce environmentally friendly products!

The plant operates according to a drainless scheme in conditions of a closed water circulation, which completely eliminates the discharge of industrial effluents, without reducing the quality of products!

Technical re-equipment and overhaul of production!

A highly professional team of specialists, there is a personal manager!

We work according to the international BRC standard!

Convenient geographical location of the railway and the federal highway!

More than 350 manufacturing companies around the world trust us!

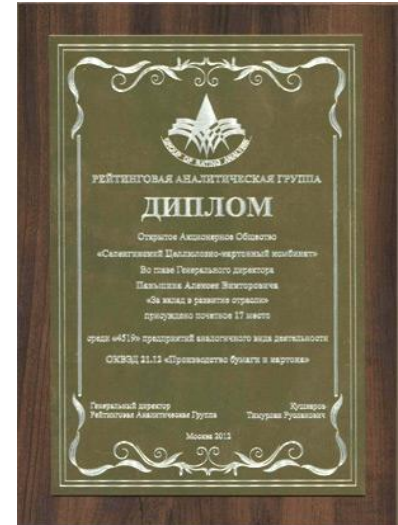

We are reliable partners in the field of compliance with requirements of the legislation!

We know our business! We know the needs of our customers!
We love our work!
